

# Another Seaward 42 in-build at Cowes

## Another Seaward 42 in-build at Cowes

### **Dateline. 5 December 2016 - Cowes, Isle of Wight, UK**

This year's Southampton Boat Show saw the debut of Seaward's new flagship, the Seaward 42. Based on the legendary Nelson hull form, this new model has been very well received by press and public alike, with considerable interest in her. The most tangible evidence of this has been the order received by the yard immediately following the show for a 42 to a similar specification. The new customer liked many of the choices made by the show boat's owner but is incorporating some of his own ideas including a small flying bridge and a slightly modified interior layout to include a double berth forward, a larger ensuite heads and shower compartment and an office in lieu of the dinette. This exemplifies the many options available to a Seaward owner. The new boat's hull is currently in build at the Seaward factory in Cowes, ahead of the commencement of fit-out in the New Year.
